

FEATURES

WARWICK, QUEENSLAND

Pulverised calcium carbonate also known as Neutralime is an off white limestone powder generally finer than 2mm

Neutralime is produced from Limestone as quarried at Warwick and is processed under our quality assurance program producing consistent chemical and physical properties resulting in a predictable and repeatable product performance for our customers. Terrequip actively manages a Quality Management System certified to ISO9001:2008

Neutralime is commonly used in the conditioning acid sulphate soils and in industry as a cost effective alkaline for pH control. The following typical properties may help you to determine the suitability of the product to best suit your application.

Warwick Neutralime (01/11)

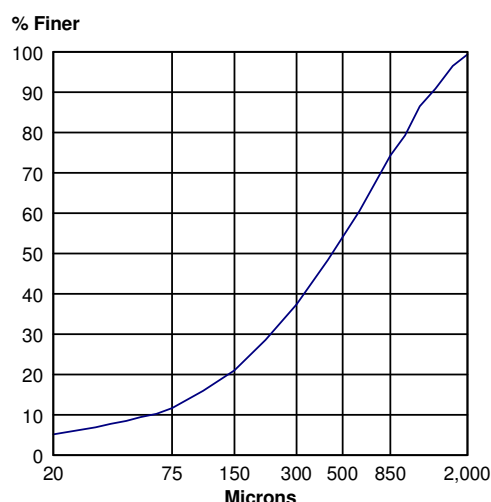

CHEMICAL AND ANALYTICAL DATA

Mean Values. These Do Not Represent A Specification

Mean Percent by Weight		(UAL 8.5)	
Total Calcium as	(CaCO ₃)		96.0
Total Magnesium as	(MgCO ₃)		0.6
Silica	(SiO ₂)		2.5
Ferric Oxide	(Fe ₂ O ₃)		0.3
Alumina	(Al ₂ O ₃)		0.6
Neutralising Value			97
Specific Gravity		UAL 2.13	2.71
Bulk Density (compacted)	(g/cm ³)	UAL 2.10(a)	1900
